

MASTR | LASER WELDING HELMET

Code: 695L000000

DESCRIPTION

The Univet “MASTR” laser welding helmet is specifically designed to protect against the scattered and diffused light generated during welding processes performed with hand-held laser systems emitting in the near infrared.

This complete solution is a union of a helmet shell made in a special compound material, a laser protective filter and a welding auto darkening filter. It is able to shield the eye and the face of the user from diffused laser light and from optical radiations generated during the welding process.

FEATURES

- Designed for hand-held laser welding systems
- Extended protection for both eyes and face
- Shell entirely made in a special plastic compound, able to resist against laser radiation*
- Laser protective filter with wide absorption range, which guarantees the visibility of major laser aiming beams (630-670nm)
- Auto-darkening welding filter (ADF) with digital controls and shade ‘3’ light state
- Weight 700g for maximum comfort during long-term use
- Regulation system to adjust helmet height and inclination. Fully adjustable headgear

*Protection levels according European standard EN207 are reported in the technical specification table

HELMET

Material Special plastic compound	Fully adjustable headgear Yes	Replaceable front shield Yes
---	---	--

ADF - AUTO DARKENING FILTER

Filter dimensions 110 x 90 x 9 mm	View area 100 x 53 mm	CE classification W3 / 4-8 / 9-13 V2
---	---------------------------------	--

Sensors 4	Light shade number 3 ^(*) 4 when laser filter is mounted	Dark shade number Variable, 4-8 / 9-13
---------------------	--	--

Shade control Digital	Switching time 40 µs	Sensitivity control Digital
---------------------------------	--------------------------------	---------------------------------------

Delay time control Digital. Adjustable 0.04-2 s	Grinding function Yes	Low battery indicator Yes
---	---------------------------------	-------------------------------------

Power supply

Solar cell, Replaceable battery
(CR2032, 1 pc)

CE MARKING - EN166, EN175, ISO 16321-2
