Select Family

The Most Flexible Laser Welding System

Select, Select Fiber – Tailored to Your Needs

Flexible Configuration for All Welding Tasks

The Select is a fully integrated system: ergonomically optimized manual welding laser, joystick controlled deposit welding system or high-precision CNC system – a unique welding concept with four high-precision axes, short setup times and easy CNC programming.

As much automation as you want, with the minimal complexity you need. All parameters can easily be adjusted without any special know-how via a multi-functional joystick and large color touch-screen.

SweetSpot™

Now Available with Fiber Laser

Select SweetSpot™

- Lamp-pumped Nd:YAG with patented SweetSpot laser resonator
- · High pulse-to-pulse stability
- Very wide power range for very small, strong welds and for highly-reflective material

Select Fiber

- Fiber laser for high process stability
- No maintenance
- Fine welds with extremely high quality requirements

Manual

- · No set-up time
- Flexible also for complex situations
- Single pieces, repair and process development

Joystick

- Direct axes-control
- Easy semi-automatic laser welding
- Single pieces, small batch series and repair welding
- Process and prototype development

CNIC

- Programming via touch screen, teach-in or data import
- · Semi or full automation
- Joystick programming of CNC process

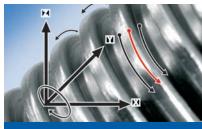

Robust All-in-One Solution

- \cdot Doors completely hidden inside the machine when open
- Large working chamber accessed by manual ports with leather cuffs
- Flow-controlled exhaust system with HEPA filters
- Closed-loop cooling circuit for 24/7 operation
- Generously dimensioned linear axes and additional rotary axis
- Ready to use after delivery

MicroWeld™ and SweetSpot Resonator®

Smallest weld spot diameters of < 0.1 mm for very fine applications showing a constantly high weld quality

Teach-Functions

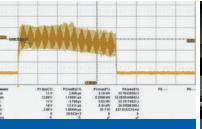

Extensive library of teaching functions optimized for laser processing

SynchroWeld™ and Look ahead

Consistent pulse overlap on seam welds independent of path contour and welding speed

V-Track

Various optimized teach modes for semi-automatic laser welding of single workpieces or small batch series

Intelligent Pulse Management™

High pulse-to-pulse-stability for fine micro welds

Axes System

Servo motor-driven linear axes with positioning control for high dynamics and high precision

Multi-Touch Display

Easy and intuitive parameter setting, ideal even for beginners

Joystick Box

Can be configured individually with 4 axes and parameter display

LASER SOURCE	Select		Select Fiber
		with SweetSpot Resonator®	
Туре	pulsed Nd:YAG	pulsed Nd: YAG	fiber laser
Nominal Power (W) with SPEEDmode™	100 200	100 200	pulsed 150/cw 250
Pulse Peak Power (kW)	12	10	1.5
Pulse Energy (J)	120	100	15
Pulse Duration (ms)	0.3 to 50	0.3 to 50	0.2 to 50
Pulse Frequency (Hz) with SPEEDmode™	single pulse up to 50 single pulse up to 100	single pulse up to 50 single pulse up to 100	single pulse up to 500
Focal Diameter (mm) with MicroWeld™	0.3 to 2.5	0.2 to 2.0 0.1 to 0.5	0.1 to 0.5
POSITIONING AXES			
Travel (x-y-z mm)	210-170-200		
Loading	50 kg (110.2 lbs)		
Resolution (µm)	1.0		
Repeatability Per Axis (µm)	±30		
Speed (mm/sec)	60		
UTILITIES			
Electrical	230 V (50/60 Hz), 16A (single phase)		
Power Consumption (kW) Nominal Power	3.5		2.0
Cooling	integrated water-air heat exchanger		air cooling
Shielding Gas	quick coupling		
Compressed Air (cooling of workpiece)	quick coupling		
MEASUREMENTS			
Weight	250 kg (551.2 lbs)		
Dimensions (W x H x D)	790 x 1262 x 1258 mm (31.1 x 49.7 x 49.5 in.)		
Ambient Temperature (Max.)	35°C (95°F)		

Outside the system corresponds to Class 1 laser product (DIN EN 60825-1).
